

Analysis By: Mike Beer

4 **CHESTERTOWN** has much to live up to after bringing \$2 million as a 2yo in training but he has shown flashes on the track and really seemed to appreciate stretching out following his useful sprint debut; was no factor in the pace-dominated Louisiana Derby last time but thought he ran quite well in both starts leading up to that and he is getting significant class relief for this. 7 **YANKEE DIVISION** caught wet track and didn't run well first off the claim for Rudy last December but he bounced back with a career-best effort in his next start while prevailing over a speed-favoring track and he nearly held on in that last one after dueling the pace in a race that collapsed; has improved for this barn and is dangerous on his reappearance if he can shake free early. 3 **DANNY CALIFORNIA** is rock-solid and figures to factor in here with his good race, which he will show up with more often than not; went out of town to get a race in last month which could give him an edge on some of these.
